## Environmental Technician (Acoustics) Belfast/Glasgow

Ref: 25133017001

**The role will involve undertaking environmental noise surveys and noise modelling and working with the Senior Acousticians**

### About Amey

Fundamental to living our core values is having great people in our business. That's why we believe that Amey is only as great as the people we employ. We place great value on our people and the contribution they make to our business, that's why we aim to offer a competitive benefits package to all of our employees. Working for Amey you will receive a competitive salary and will be able to join our contributory pension scheme. In addition you will be entitled to Company sponsored life assurance and a generous holiday entitlement. You will also be invited to join Amey Choices which offers a range of flexible benefit options and offers additional benefits available throughout the year. Amey is an equal opportunities employer.

### What is the purpose of this role?

The role will involve undertaking environmental noise surveys and noise modelling and working with the Senior Acousticians in the delivery of the noise assessment reports required for planning applications, for Environmental Statements for major projects and for construction and operation noise monitoring. You will be working on a variety of exciting infrastructure projects encompassing road schemes for clients including Highways England, Transport Scotland and the Department for Infrastructure (NI) and rail enhancement and electrification projects for Network Rail and Transport for Wales. Based in our Belfast or Glasgow office, the job will require occasional travel as required to meet the needs of the business.

### What are we looking for?

- Have a degree or relevant qualification in Environmental Science, Acoustics, Music Technology or related discipline, or equivalent work experience;
- Be committed to a career in Acoustics;
- Have experience of noise surveys and an awareness of the noise modelling process and associated software;

- Have an awareness of relevant noise assessment guidance and the Institute of Acoustics;
- Possess excellent data analysis skills and attention to detail;
- Experience of contribution to a team within an Acoustics environment is desirable;
- Willingness to work towards Institute of Acoustics (IoA) membership and, if relevant, to undertake the IoA Diploma in Acoustics & Noise Control;
- Excellent IT literacy, particularly with MS Office packages;
- A full, clean UK driving license.

## What makes this role unique?

You will assist Engineers with inspection work, feasibility studies, report preparation, cost estimating, Quality Assurance responsibilities.
