

Analytical Technician – Chromatography Unit CDD

<https://www.medincell.com/who-are-we/>

We are looking for an Analytical Technician with pharmaceutical experience to join our chromatography unit in Montpellier. An ethical fast-growing, socially responsible company dedicated to Global Health.

Responsibilities

- Set-up equipment (eluent preparation, column installation, system priming, etc.) for method development/suitability or qualification
 - Prepare test samples & test solutions during studies
 - Write and update SOPs related to equipment use or analytical procedures
 - Perform analytical procedures (equipment set-up, sample preparation, sequence launching, chromatogram processing, etc.) during method qualification, QC incoming materials, DP batches or ICH stability studies
 - Troubleshoot equipment issues and plan periodic equipment qualification, maintenance or calibration
 - Train new users in equipment use and analytical procedures
 - Provide technical input into the creation of the Analytical Target Profile of chromatographic methods for each project
 - Participate in the experimental design for method development
 - Participate in data treatment and analysis
 - Maintain effective records of work completed in the lab book
 - Draft protocols and technical reports for review by Analytical Scientists and/or Analytical Lab Leader
 - Perform analytical method development, qualification and transfer within an appropriate quality framework and in compliance with Company Quality Management System
 - Report and implement tracking of deviations and changes during method development, qualification and transfer

Experience

- Minimum 1 years experience in the operation of HPLC/UPLC systems coupled with UV/DAD/LSD/MS/FLR detection (equipment set-up, sample preparation, chromatogram processing) and the use of Empower® CDS software
 - Experience in the Pharmaceutical industry under GMP/GLP is highly desirable
 - Experience in writing/reviewing technical documents (SOPs, protocols & reports) in English is desirable
 - Experience in GC-FID and CompassCDS software is a plus
 - Experience in GPC-RI and processing GPC data is a plus
 - Experience in GPC-TDA and OmniseC® software is a plus.
